Sample Site Plan

A well-prepared Site Plan is one of the MOST IMPORTANT documents in your building permit submittal materials. ALL major review groups need to approve your site plan.

Site Plans must be clearly legible and reproducible. A complete and accurate Site Plan will help to speed your permit application reviews and reduce the need to send you notice for missing information or charge you additional review fees for missing data.

This sample drawing has been designed to help you prepare a complete Site Plan for your project. Make sure your Site Plan includes all the information on the Site Plan Checklist.

PLEASE NOTE: The sample site plan to the left is provided as a reference tool showing how and what must be included in your site plan.

This sample site plan is not to scale, nor is it the on the minimum paper size.

Your site plan must be to scale. Our required scale is minimum 1 inch = 10 feet. Minimum paper size is 11x17.

Site plans submitted to other departments for their application/review will not be used in lieu of missing site plans. A site plan must be submitted with construction documents for Building Dept. review approval.
