

On 8-24-20 Tapani will be back out on Columbia Ave to continue the install of the new sewer line on Columbia St from Miller west to Bird St. Attached is the traffic control plan that will be in place for this stage of work. We will be using a detour on West Lane Rd, CZ Rd, and Miller Rd to keep traffic moving around the construction traffic during the day. If you live in the work zone you will get a visit by a Tapani employee to coordinate your access during construction. There will be weekly updates to follow.

As we move forward installing the sewer line, do not forget that interruptions to construction do occur and these updates are critical for awareness. They impact our crew safety and resident planning. Please be aware that the project schedule can change from day to day as we do our best to provide a quality project in a timely manner.

Please be aware of construction activities at all times. This includes and is not limited to pipe crew member, flaggers, company vehicles and large equipment, dump trucks and their trailers and all pedestrian traffic.

Please obey all construction signing especially detour routes and flagger directions. Our flagging personnel are happy to help with any questions you may have. As the new detour starts, please be aware of all traffic patterns and traffic density in your area.

Please be safe and be aware of our construction workers as they are committed and focused on construction activities.

Thank You and Best Regards,

Jerome Sarkinen
