

Excessive Heat Expected This Weekend

National Weather Service - Portland, OR

Issued: 6 AM August 13, 2020

Next Update: By early Friday afternoon

Point of Contact: NWS Operations (24/7/365) (503) 326-2340

KEY POINTS

- Excessively hot temperatures expected through the Willamette Valley and Columbia River Gorge through the weekend.
- Elevated fire concerns Friday and Saturday.
- Warm temperatures along the coast Saturday.

CONFIDENCE AND DETAILS

Willamette Valley & Central Columbia River Gorge

HIGH Confidence

- Excessive heat with temperatures reaching 95°-100° on Saturday and Sunday.
- Nighttime temperatures in the mid to upper 60s.
- Conditions will be dry and breezy Friday and Saturday.

MODERATE Confidence

- Some areas, especially those in urban areas and south of Salem, may see temperatures above 100° but less than 105° on Saturday.

LOW Confidence

- A slight chance that cooler air from the coastal areas could move into the valley on Sunday keeping temperatures lower.
- Any developing clouds may lower temperatures on Sunday.

Details:

Very dry and hot conditions expected through the weekend. Conditions begin to warm on Friday, with the hottest days occurring Saturday and Sunday. A slight chance for lower temperatures on Sunday due to onshore flow from the coast bringing in cooler air and clouds.

South Washington, and north Oregon Coast

HIGH Confidence

- Sunny and warm conditions expected.
- Temperatures 80°-90° Tillamook north on Saturday.
- Sunday will likely be cooler than Saturday.

MODERATE Confidence

- Extensive onshore flow may bring enough marine clouds to keep temperatures near or slightly below 80° on Sunday.

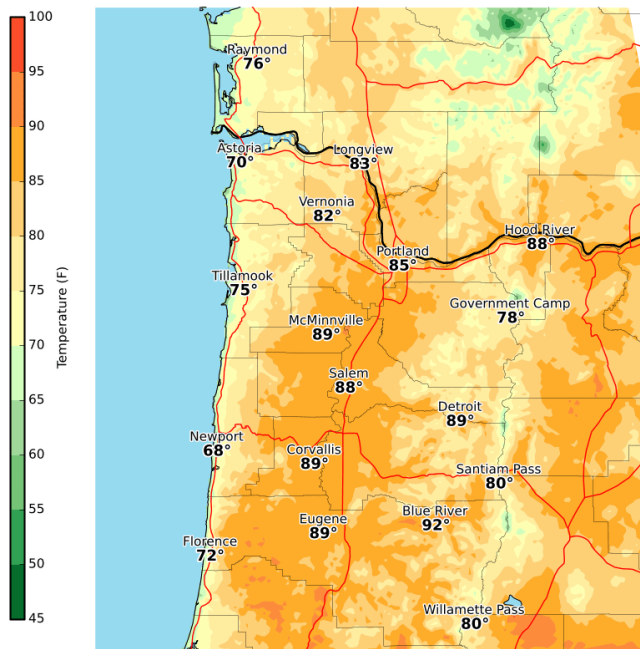

Details:

A warm weekend with temperatures in the 80s is expected for all of the coast but especially the north Oregon coast. Hottest day expected on Saturday.
