

### Scappoose Pool Cost Survey

The Scappoose City Council would like your feedback on how to fund the construction and operation of a pool in Scappoose. While all members of City Council would like to see a community pool, the reality is that the City cannot afford to build or operate such an expensive facility with current funding. Based on pools recently built in other Oregon cities, an outdoor pool is *estimated* to cost \$3,500,000. An indoor pool is *estimated* to cost \$11,000,000. Operating a public pool would cost approximately \$500,000 each year.

To build and operate a pool, the City would need voter approval for property tax increases. City staff has worked with the County Assessor to understand how much in additional property taxes Scappoose residents would need to pay to make a pool a reality. Considering the cost to build and operate a pool, City Council wants your feedback on whether or not you are comfortable paying the additional property taxes needed to fund a pool.

City Council will use this information to guide and inform possible pool funding options.

**The privately funded pool donations, totaling \$48,330.63, will remain set aside for an aquatics-related amenity, regardless of any decisions made by City Council.** More
